

Flag: flag{155d78118a629e87707abb02cf33006820c84c0773c4d8}

Used Tools:

- Used Netcat to scan for listening ports.
- File Transfer via Netcat.
- Browsed the web root through commands and found a private key (id_rsa)
- Fixed permissions of the file and attempted SSH.
- Learned some useful commands.

Short tutorial with not too many struggles, flag was found seamlessly.
